TOWORKFOR®

BOLDLY SAFE

BOLDLY SAFE.

Toworkfor is a brand for the real hard-working people.

Everything we do is bold in design, innovation, and technology, thinking about those who face real risks, every day. After all, if all the workers must be bold in their daily life, the least we can do is to be bold, too.

Cause risk is everywhere, safety is everything.

ARE YOU BOLD ENOUGH?

BE ONE STEP AHEAD.

DRYFEET

Functional lining fabric for the waterproof resistant and breathable system.

FASTFIT

Smart & fitting lace system.

X-BALANCE

The precise foothold for stability.

TOE CAP ALUMINIUM

Lightweight toe cap against pressure up to 200 Joules. Rubber coating for extra protection and easy cleaning.

FLOAT

The high tenacity fabrics for zero perforation give strong flexibility and lightness.

CARBON PRO

Best conductive foam for maximum performance with lighter and impulse properties.

SPHAIR OUTSOLE

The air bubbles technology structure gives a plenty cushioning system.

STICKY CLEAT

Strategically positioned for optimum grip in areas where grip is best needed.

SOFT CLEAT

Delivers a kick of energy with each step.

SPHAIR HEEL

Adaptive heel cushioning for any gait cycle.

SAFETY ENGINEERING RIGHT ON YOUR FEET.

RUB X PRO HEEL SUPPORT

Higher protection for the foot with extreme balance and stability features.

COMFORT INSOCK

Soft and light with anti-static points. Easy to remove for cleaning and drying.

Q-FLEX INSOLE

Anti-perforation, non-metallic and anti-static insole.

FUSION BICOLOR PU SOLE

Extremely soft and comfortable PU midsole in combination with a hard PU outsole which provides great grip.

SRC Certification

HYDRATEC

Waterproof membrane that keeps the foot warm and dry in extreme situations.

NUBUCK LEATHER

Long lasting, flexible and breathable.

S3 Certification

CARBONLIGHT TOE CAP

Non-metallic and ultra-light toe cap against pressure up to 200 Joules.

TOE REINFORCEMENT

Extra protection and resistance.

TOWORKFOR SOLES

SAFELIGHT EVA SAFETY SOLE

EVA is one of the best materials in terms of impact absorption and lightness. The SAFELIGHT sole innovates with a special EVA compound specific for safety footwear: anti-static with excellent abrasion characteristics, non-slip and resistant to high temperatures up to 300°C.

EVA SAFETY

AIR TUBELESS RUBBER SOLE

The AIR TUBELESS sole offers excellent anti-slip performance, durability, resistance to fuels and oils, and is electrostatic dissipative conductive - ESD. But the differentiation is the exclusive comfort technology biomechanically tested by INESCOP.

MICHELIN NORTH NITRILE RUBBER SOLE

Nitrile Rubber stands out for its great fuel, oils, and fire resistance temperatures up to 300°C. The MICHELIN NORTH sole is inspired by ice and mud winning tyres, providing a multifunctional sole with full traction, grip and control, designed for all outdoor work activities.

BASKET RUBBER SOLE

Rubber offers excellent durability, resistance to fuels and oils, and is electrostatic dissipation conductive - ESD. The BASKET sole has excellent anti slip performance, both on wet and ceramic floors and its exclusive design is inspired in basketball shoes to ensure greater flexibility, comfort, and elasticity.

ATOMIC TPU BICOLOR SOLE

TPU is a soft and flexible high-quality material with superior resistance to wear and abrasion. The bicolor ATOMIC sole is ESD certified and ensures full ground contact, providing excellent slip resistance characteristics. The rounded heel transfers the energy of the impact force from the heel to the elevation of the foot, increasing the perception of comfort.

HERO NITRILE RUBBER SOLE

The HERO sole in nitrile rubber, stands out for its resistance to fuel, oils and high temperatures up to 300°C. The good depth of groove in its design offers excellent surface grip on wet steel or uneven industrial flooring, while the rounded heel transfers the energy of the impact force to the elevation of the foot, reducing tiredness.

NITRILE RUBBER

BASKET ECO RUBBER SOLE

A biodegradable sole with environmentally friendly SOLESTAINABLE technology, made with wood cellulose, rubber and recycled waste raw materials. The BASKET sole design offers the same cleats for maximum grip and adaptation to different indoor flooring and the same GRIP SYSTEM Heel for extra stability and durability.

FUSION PU | NITRILE RUBBER SOLE

The FUSION sole has a flexible and lightweight soft polyurethane midsole, which ensures excellent impact return energy and comfort for prolonged use. The hard nitrile rubber outsole provides extreme durability and resistance to fuels, oils and high temperatures.

NITRILE RUBBER

SPHAIR AIR BUBBLE TECHNOLOGY

SPHAIR Air Tubeless is a revolutionary technology with an insulated layer of air beads that offer an extreme feeling of comfort, shock absorption and ultra-lightness. It also has a unique Single Action Cleats system for superior grip, great traction control, and a unique multi rebound effect.

SKOVSON NITRILE RUBBER SOLE

SKOVSON technology is made with a special high-performance, flexible compound and high levels of adaptability to the ground, for extra comfort and stability. Designed for mountain climate and outdoor work or activities, the SKOVSON sole is extremely durable, moisture-proof and provides top grip and traction even in slippery conditions.

SKOVSON

TRIPLE SPEED EVA & RUBBER SOLE

TRIPLE SPEED technology is based on the performance of sports shoes. The EVA midsole provides extra lightness, comfort, and impact absorption, while the rubber outsole design offers a self-cleaning system for no dirt accumulation, maximum anti-slip performance and optimal resistance to oil and abrasion.

TRIPLE DENSITY PU SOLE + SMOOSH

The perfect combination of three different PU densities results in this TRIPLE DENSITY sole, with an extremely soft and comfortable midsole, a hard PU outsole for great grip and resistance to oil and abrasion and, best of all, the insert of SMOOSH technology in the heel to offer maximum comfort, impact absorption and rebound effect.

CITY PU SOLE

Polyurethane is flexible, lightweight, and resistant to oil and 120°C heat. The CITY sole has soft polyurethane which guarantees excellent restitution of impact energy, softness, and comfort for prolonged use. It's extremely light, flexible, and elastic. It has good adhesion, good slip, and heat resistance.

PARK SOLE NITRILE RUBBER

Designed to offer the best performance in everyday firefighting, PARK's nitrile rubber outsole offers maximum resistance to abrasion, fuel, oils, and fire up to 300°C. Its exclusive design ensures maximum grip, flexibility, comfort, and elasticity.

NITRILE RUBBER

DOUBLE DENSITY PU SOLE

This sole blend two different PU densities, where the midsole is extremely soft and comfortable, while the hard PU outsole provides great grip and resistance to oil and abrasion. The minimalist design of the outsole offers excellent traction, anti-slip and durability characteristics to get the job done - no matter the floor.

TOWORKFOR INSOLES AND INSOCKS

BIORELAY
ANTI-FATIGUE INSOCK

Anti-fatigue and anti-bacterial insole with an active carbon base. Super comfortable, 100% breathable, extra-light, anti-static, and made with recycled materials.

COMFORT
ANTI-FATIGUE INSOCK

Polyurethane foam insole with anti-static dots. Supports and stabilises the foot, optimising weight distribution and facilitating balance.

CARBONPRO^{FLY}
ANTI-FATIGUE INSOCK

Made with the best conductive foam for great anti-static, lightness, and impulse performance. Microperforated for better air circulation, quick drying, and anti-odour.

ACTIVEFOAM
HIGH DENSITY PERFORMANCE
ANTI-FATIGUE INSOCK

Made with special foam, this insole relieves pressure on the heel to promote active recovery and prevent muscle fatigue. Light, anti-static, breathable and very comfortable to wear.

Q-FLEX
COMPOSITE INSOLE

Non-metallic and anti-static protective insole, made of advanced composite materials. Anti-perforation protection, with greater flexibility and ergonomic, thermally insulating.

STEEL
STEEL INSOLE

Stabilizing insole made of steel which, being metallic, offers high levels of anti-perforation. It also has anti-static and anti-perforation features.

CORK
CORK INSOLE

Made with high quality materials with excellent resistance to water, petrol, and oils. It's perfect for heavy and long-lasting physical work. It works as a thermal regulator, and it is also very flexible and has great breathability properties.

FLOAT
FLOAT INSOLE

Anti-perforation protective insole with non-metallic, sweat-absorbing, lightweight and flexible characteristics, which provides high levels of comfort. Ideal insole for shoes used for long daily routines.

TOWORKFOR TOE CAPS

CARBONLIGHT
COMPOSITE TOE CAP

Protects the toes against mechanical damage and pressures of up to 200 Joules. Does not disintegrate under high loads. It is thermally insulating. Up to 50% lighter than insulating steel.

ALUMINIUM
ALUMINIUM TOE CAP

Protects the toes against mechanical damage and pressure up to 200 Joules. Not subject to corrosion, has low thermal conductivity. Up to 50% lighter than steel.

STEEL
STEEL TOE CAP

This traditional, reliable, and safe toe cap protects the toes against mechanical damage and pressures of up to 200 Joules.

TOWORKFOR MATERIALS

PERWANGER® PREMIUM LEATHER

Exclusively from premium high quality Alpine region cattle, this premium leather is waterproof, breathable, scratch-resistant, and highly durable even in rough and rocky terrain. The leather's water-repellent properties, colour and structure are

ANILINE PREMIUM LEATHER

High quality leather with excellent resistance to water, petrol, and oils. It is great for heavy physical work, long-lasting. This material is very flexible and has good breathability features.

NUBUCK NUBUCK LEATHER

Soft treated leather, with excellent perspiration characteristics that significantly increase the level of comfort. Excellent resistance and durability.

SUEDE SUEDE LEATHER

Treated leather with excellent breathability and flexibility characteristics. Not water resistant, but perfect for working in hot and dry weather.

RE-CANVAS RECYCLED PET TEXTILE

Re-Canvas is a more environmentally friendly, durable, and water-resistant weave textile. Made from natural biodegradable and recycled fibres, this material also offers excellent breathability and heat regulation features.

MICROFIBER POLYESTER FIBERS

Innovative material made of polyester fibers, water resistant and highly durable. Allows natural breathing. Prevents a wide range of colours that keeps with the shoe throughout its life. Animal Friendly.

MESH POROMAX ABSORBENT LINING

Innovative technology due to a special structure of internal chambers that removes hot moist air over the top of the shoe and facilitates uniform temperature distribution within the shoes.

MESH SPACE 3D MESH LINING

Special Mesh knit for excellent breathability and flexibility. The high durability of the material allows to keep the properties throughout the period of use.

DRY FEET KNIT POLYESTER FIBERS

DRY FEET KNIT is a revolutionary technology that is highly breathable, flexible and abrasion resistant. The extremely malleable fibres are designed to easily adapt to the ankle and foot, while the anti-sweat proportions help keep the foot always dry even in hot and moist environments.

HYDRATEC® WATERPROOF MEMBRANE

HYDRATEC® is a special membrane which absorbs the water vapor and removes it through the lining to the outside. This keeps the foot warm and dry even in extreme situations. The best feature is that the higher the physical activity, the more efficient the Hydratec membrane works. This technology also provides effective protection from low temperatures and rain.

MATERIALS AND PRODUCTION

All the materials used, either natural or synthetic, and also the applied production techniques were chosen to comply with the requirements of the above European standard in what concerns safety, ergonomics and comfort.

Besides the required basic characteristics, the footwear may have additional characteristics indicated by the symbols or categories in the labels inside the footwear.

REQUIRED CHARACTERISTICS

FOOTWEAR: Upper height; heel; sole performance (production and resistance to the detachment of the upper/sole); feet protection and toecap characteristics (except EN ISO 20347), anti-slip properties.

UPPER: Upper materials characteristics, lining, tongue, insole/sock (resistance to tear and abrasion, traction characteristics, water vapor permeability, pH and absorption and desorption for the insole/sock and midsole).

SOLE: Production and resistance to tear, abrasion, flexion, hydrolysis, sole/midsole detachment, oil and hydrocarbons (EN ISO 20345 S1-S2-S3).

WE NOW SELL BODY CONDOMS

WORKWEAR

TOWORKFOR®

BOLDLY SAFE

THE TOWORKFOR'S PPE **MANAGEMENT PLATFORM** **IS COMING SOON.**

The new TOWORKFOR workwear collection is much more than just work clothes.

We now present a revolutionary technology that will change the way companies manage their employees' PPE.

The "TWF MANAGEMENT TOOL" uses an evolved RFID system to, through sensors placed in the PPE'S, optimize several daily tasks:

Can you imagine controlling on-time if all workers are wearing all the PPE's?

Intelligently managing the company's PPE stock?

Automatically recording the PPE delivered to each worker?

Know how many times each PPE was used by each worker?

Replacing the traditional time clock with an automatic individual access?

All this is possible and much more. Talk to us and find out all that "TWF Management Tool" can do for you and your business.
